TRANSFORMING HEALTH CARE
RESTORING PURPOSE

ELIZABETH TEISBERG, PHD
EXECUTIVE DIRECTOR

The University of Texas at Austin
Value Institute for Health and Care
Dell Medical School & McCombs School of Business
In Health Care, Everyone Has a Story

Quality of Life and Dignity of Death Are at Stake

Smart, Caring, Hard-Working Professionals

Highly Variable Outcomes, Increasing Costs, Slow Innovation
The goal must be, to achieve better outcomes for individuals and families.
Healthcare

More treatment is not the real goal

The purpose of health care is health
COST REDUCTION IS NECESSARY AND NOT SUFFICIENT

LOW COST TICKET THAT DOES NOT GO WHERE YOU NEED?
THE GOAL IS CREATING VALUE FOR INDIVIDUALS AND FAMILIES

\[
\text{VALUE} = \frac{\Delta \text{HEALTH OUTCOMES THAT MATTER TO PATIENTS}}{\text{COST OF FULL CYCLE OF CARE}}
\]

VALUE IS CREATED WHEN A PERSON’S HEALTH OUTCOMES IMPROVE
Better outcomes reduce costs

Living in good health is inherently less expensive than living in poor health.
VOLUME

VALUE

VALUE
HEALTH CARE NEEDS TRANSFORMATION
Health
CAPABILITY
COMFORT
Calm
