Unicancer and their Comprehensive Cancer Centres
The only French hospital network entirely dedicated to fighting cancer

General presentation

May 2019
Unicancer is the only French hospital network that is dedicated entirely to fighting cancer.

- **18 French Comprehensive Cancer Centres (FCCC)**
- non-profit private healthcare institutions
- **20 hospitals in France**
- **500,000* patients each year**
- **20,000 men and women dedicated to constantly seeking excellence in healthcare, research and higher education**
- **1/3 of French international publications in the field of oncology**

* in short stays, home care and outpatient services

** results of a bibliometric study on the Thomson Reuters database for the period 2010-2015
Unicancer, CLCC network

May 2019
Unicancer = a network of 18 CLCC

1-2. Institut de Cancérologie de l’Ouest - Unicancer Pays de la Loire
3. Institut Bergonié - Unicancer Nouvelle-Aquitaine
4. Centre François Baclesse - Unicancer Normandie-Caen
5. Centre Jean Perrin - Unicancer Clermont Auvergne Métropole
6. Centre Georges-François Leclerc - Unicancer Bourgogne Franche-Comté
7. Centre Oscar Lambret - Unicancer Hauts-de-France
8. Centre Léon Bérard (Lyon)
9. Institut Paoli-Calmettes - Unicancer Marseille
10. Institut du cancer de Montpellier
11. Institut de Cancérologie de Lorraine (Nancy)
12. Centre Antoine Lacassagne - Unicancer Nice
15. Institut Godinot - Unicancer Reims en Champagne
16. Centre Eugène Marquis (Rennes)
17. Centre Henri Becquerel - Unicancer Normandie-Rouen
18. Centre Paul Strauss - Unicancer Strasbourg
19. Institut Claudius Regaud - IUCT-OncoPole (Toulouse)
20. Gustave Roussy (Villejuif)
The Unicancer network: Map of national medical partnerships
Unicancer: a shared brand name

- A brand name shared by all our Cancer Centres and identifiable by the common Unicancer logo alongside that of each Centre

- Guarantees a specific CLCC cancer treatment model
  - to stand out
  - to come together
  - to be stronger
Shared brand name, shared values

- **Human first and foremost**
  - 20,000+ men and women working together for a humanist approach to medicine, respectful of each of our patient's needs

- **Excellence**
  - The constant pursuit of excellence to be at the forefront of the fight against cancer

- **Solidarity**
  - CLCC are healthcare facilities with a mission of public service, for the public, accessible to everyone without excessive fees

- **Innovation**
  - CLCC are driven by research, the reason for our shared progress and the improvement of our treatment and care for everyone
The Patient Charter

In addition to the CLCC shared values, the charter of commitments to our patients forms the basis of our care model followed in all 18 Unicancer CLCC

6 inseparable and common commitments for all CLCC
Unicancer: who does what?
Unicancer is composed by

- the French National Federation of FCCCs and its personnel,

- as well as a Groupement de Coopération Sanitaire (Healthcare Cooperation Group), created to pool and strengthen our skills, resources and practices.
Unicancer Management

Chair and general delegation

- Department of R&D
- Purchasing department
- Department of finance and administration
- IT department
- Department of medical strategy and performance
- Department of development, communications and international relations
- Human Resources Department
Unicancer's mission (1/2)

- **Department of medical strategy and performance**
  - Manages scientific and medical development in our CLCC
  - Elaborates our financial strategy
  - Leads prospective studies
  - Promotes our quality strategy
  - Provides legal advice to CLCC

- **Department of human resources**
  - Oversees the CLCC Collective Agreement
  - Continuous training

- **Purchasing department**
  - Negotiates with CLCC shared markets: medical, logistical, services, etc..
Unicancer's mission (2/2)

- Department of development, communications and international relations
  - Defines and implement our communications approach
  - Develops communication tools and activities
  - Manages crisis communication
  - Represents Unicancer and communicate the Centres' expertise to both French and international institutions

- IT department
  - Leads strategic IT projects such as ConSoRe

- Department of research and development
  - Promotes clinical trials
  - Launch large prospective or retrospective epidemiological cohort studies
The Unicancer network, home to experimentation and innovation

Some examples:

- **Patient care**: Our Interdisciplinary Consultation Appointments (ICM) - general diagnosis meetings followed by Cancer Plans
- **Patient/partner culture**: Study of patient expectations (2011)
- **Sustainable medicine benchmarking, HR, research**: Pioneers in this approach, applied internally in our CLCC and externally (CLCC VS other healthcare facilities)
- **Quality**: CLCC have been a shining example when it comes to national quality indicators since their foundation in the 2000s
- **Prospective studies on the evolution of cancer care**: (included in our Cancer Plan 3)
Research: some key figures

- **6 cancer research facilities** (SIRIC) (out of 8 in France) - **12 early clinical testing centres** (classified as CLIP2 by the French National Cancer Institute or Institut National du Cancer (INCa)) (out of 16 in France)...

- **569 active clinical trials carried out by Unicancer's CLCC and R&D department** - of which 86* are led by Unicancer's R&D department

- **15% of CLCC patients were included in the clinical trials** (10% set by the Cancer Plan 2) - of which 4989* were included in Unicancer R&D trials

- **20 hospital clinical research programmes (PHRC) in cancerology** (out of 39 in France)

- **Unicancer network produces a third of French international publications in the field of oncology** **- for Unicancer's R&D department: 25* publications (one of which included in The New England Journal of Medecine) and 40* communications (14 for the ASCO, 9 for the ESMO, 11 for the San Antonio Breast Cancer Symposium)**

Unicancer, the first academic developer of clinical trials in oncology on a European scale.

Unicancer: our prospective vision

May 2019
We decline our values in a strategic plan for the next three years

- Axis 1: The patient, active participant in their own treatment

- Axis 2: CLCCs (Centres in the fight against cancer) always at the forefront in the fight against cancer

- Axis 3: A network of experts whose activities encompass a territorial framework
Thank you for your attention!

Our unique and different model of cancer care in France

Our 6 inseparable characteristics

1. **100% dedicated** to the fight against cancer
2. Constantly at the forefront of the fight against cancer
3. Concentrate the best resources in terms of research and development
4. Aim for excellence to continuously improve the overall care of the patient
5. Guarantee each patient global care without any excess of fees through the strict application of tariffs and their accessibility to all
6. Organize the fight against cancer with humanism
