Welcome to the Healthcare Management and Leadership Competency Platform

This is a self-assessment instrument that is designed to help healthcare managers identify their individual management and leadership competencies. This self-assessment has two parts, the first allows you to score the competencies required for your current position and the second allows you to score your level of competency for each area.

REGISTER

Improve yourself as a healthcare leader and get results for your organization

Available in:

- English
- Spanish
- French
- Traditional Chinese
- Farsi
- Portuguese
- Russian

Official launch of the new platform: November 30th

Benefits

For users:

- Identify which competencies you should improve
- Compare your score with the rest of the world
- Get a certificate and share it on social media
- Access some useful resources to keep improving

For IHF Members:

- Access to anonymized data to conduct analytics on the basis of the results of people from your country/organization

Official launch of the new platform: November 30th

Future Priorities

- Continue **Developing Professionalization** to enhance healthcare management learning practices to support the continuum of health management development.
- **Disseminate** this transformational approach and tools with health management education/training programs; the field of practice and related accreditation organizations through **the use of the Leadership Competencies Directory** to advance the professionalization of our discipline (meetings, publications-journals-textbooks, etc.)
- Develop appropriate **mechanisms that add value to our collaborative initiatives** and contribute to the academic and health management practice competency development. (relevant resources/materials to update competencies in IHF Directory)
